

INTRODUCING

Flores Mobile App

Flores is pleased to introduce our newest service enhancement

***** *The smart phone e-receipt app* *****

This tool was designed to provide you with an additional option to submit a claim to Flores.

Use your phone's camera to take a picture of your documentation and upload it directly from your device.

It is a simple three step process after you login to the application.

- 1. Take picture through e-receipt app**
- 2. Select document type to be sent**
- 3. Submit to Flores**

You may photograph multiple receipts prior to submitting the documentation. Once the documentation is submitted you can expect the same email notifications and optional text updates if you have an email address on file and have added your cell phone number through www.flores247.com. The application even allows you to sign directly into our mobile website without prompting for another user name and password.

TIP: Please take pictures of documentation with sufficient lighting to ensure faster processing

**Flores
e receipt app
is now
available for
iPhone &
Android
smart phones.**
